

October 2024

Green Room Newsletter

We officially made it through our first month of school! I am so excited to continue this new adventure with all of you. The first week of October we will be learning about Apples. We will be using apples to create art, as well as measure how tall our friends are by stacking apples. This Month we will also be starting the Letters in the Alphabet. Each week will be a new letter, as we start with the letter "A" this week! Each month our class will also be learning shapes and colors as we make our own color/Shape & Alphabet wall. In our second week, we will be discussing Fire Safety, and how it's important to be aware of the dangers of Fire. At some point this month we will be getting a visit from our local Fire Fighters (Date->TBD). Our class will be making Thank You Cards for all the hard work they do to keep us safe. We also will be doing some fun fire sensory bins that will help the class explore what fire is and how we can stop it. The third week, we will be talking and exploring the nighttime with the many different nocturnal animals. Our class will be creating different types of animals that are awake when we are sleeping. We will be learning about the animals and how they live, eat and how they interact with other animals. Our class will be creating our very own Cave for our nook area with different nocturnal puppets they can explore with. Our fourth week, we will be traveling to outer space and learning what our galaxy is. We will be exploring through the many different sensory bins and through our art. Our class will be learning about planets, astronauts and the stars/moon. Our last week this month, will be Halloween themed. We will be exploring through the fun and silly activities that are planned to get into the Halloween spirit. Our class will get into the holiday mood by creating candy corn, dissecting pumpkin guts, making toilet paper mummies and of course dressing up! I am so excited for what our class will be creating, exploring and learning!
